Data Quality Report Template

The Data Quality Report Template will summarize data quality issues from the selected source, including severity levels and resolution plans. It will aid in systematically identifying and rectifying data discrepancies.

Data Source	Data Quality Issue	Severity	Resolution Plan
Dataset	No missing values or duplicate rows were found in 50,000 records across 19 columns. Numeric ranges are also valid.	Low	Run null, duplicate and range checks before each refresh; no imputation or row deletion is required.
Dataset	The time_taken_to_order name can be confused with delivery time, and numeric IDs may be aggregated incorrectly in Tableau.	Moderate	Document the field meaning, use a clear display label, and set order_id/user_id as identifiers or dimensions.
