

Business Question and Visualization Report

Date	1 August 2026
Project Type	Individual Project
Project Name	Food Ordering Behavior
Maximum Marks	5 Marks

Business Questions and Visualisation

The following business questions are derived from the three project scenarios and are linked to the visualisations available in the Tableau workbook.

1. Which key performance indicators summarize the current food-ordering business performance?

Scenario: Rahul Sharma (Business Analyst) and Priya Mehta (Operations Manager)

Visualization: KPI cards showing Total Orders, Order Value, Delivery Fee, and Average Rating.

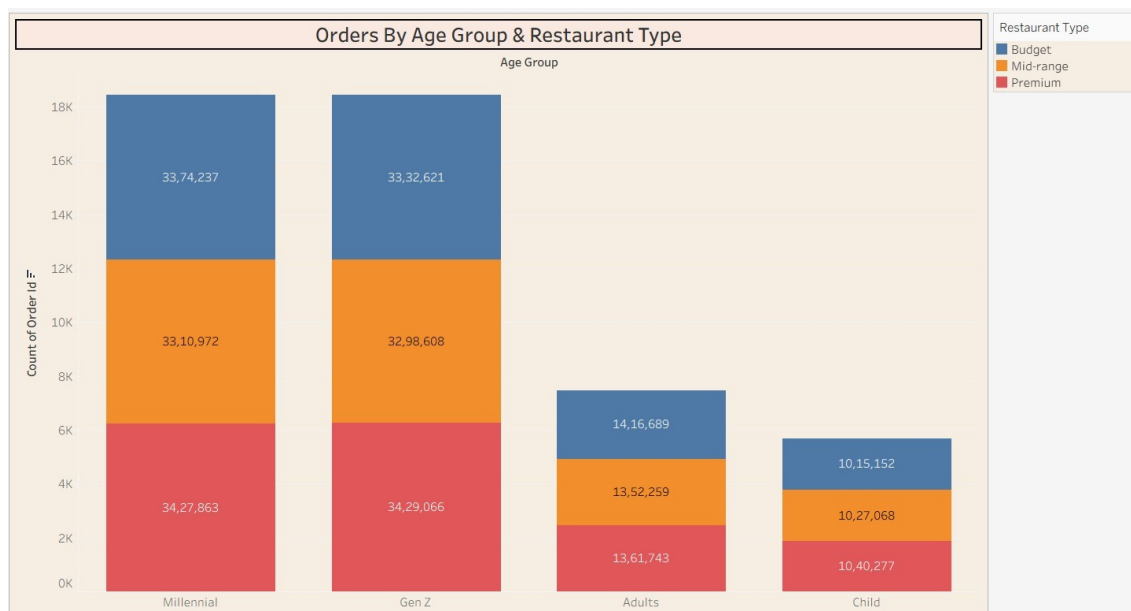

Delivery Fee: 2.98M	Order Value: 27.39M	Avg. Rating Given: 2.99	Total Orders: 50,000
---------------------	---------------------	-------------------------	----------------------
