Food Ordering Behaviour and Consumer Trends

The Tableau story presents food-ordering behaviour and consumer trends through a sequence of dashboards covering cuisine, age group, company type, meal type, customer rating, city order volume, revenue contribution and delivery time.

FOOD ANALYSIS

Observations:

- **Total Orders and Order Value:** The dashboard records 50,000 total orders with an overall order value of 27.39M and delivery fees of 2.98M.
- **Top City by Order Volume:** Mumbai has the highest order volume among the displayed top five cities, with 8,443 orders.
- **Cuisine Preference:** Biryani, Chinese, Desserts, Fast Food and South Indian cuisines have very similar shares, each contributing about 16.6%–16.7% of the displayed cuisine preference.
- **Meal Type Revenue:** Breakfast generates the highest displayed order value at 11,83,066, followed by Dinner at 11,44,561.
